

SANGOMA: Stochastic Assimilation for the Next Generation Ocean Model Applications

EU FP7 SPACE-2011-1 project 283580

Deliverable 6.8: Workshop 2 for operational users

Due date: 30/9/2015

Delivery date: 30/10/2015

Delivery type: Report , Public

J.-M. Beckers A. Barth Y. Yan F. Laenen M. Canter
University of Liège, BELGIUM

P.-J. Van Leeuwen S. Vetra-Carvalho
University of Reading, UK

L. Nerger P. Kirchgessner
Alfred-Wegener-Institut, GERMANY

A. Heemink N. van Velzen M. Verlaan U. Altaf
Delft University of Technology, NETHERLANDS

P. Brasseur J.-M. Brankart G. Candille S. Metref
CNRS-LEGI, FRANCE

P. de Mey
CNRS-LEGOS, FRANCE

L. Bertino F. Counillon
NERSC, NORWAY

Chapter 1

Organisation

The first meeting with operational users was done during the second myOcean Science days (see deliverable DL6.7 with 60-70 participants attended the workshop on data assimilation and four oral presentations and four posters showed the SANGOMA approach). It turned out to be an efficient way to reach out to operational users.

For the second workshop planned with operational users, we decided again not to make a independent formal meeting but to take advantage of other meetings to reach operational users. This was also justified by the conclusions of the myOcean Science days where it was made clear that downstream users should not be invited to several project meetings but rather to larger meetings.

Chapter 2

Meetings with strong presence of operational users

- Third MyOcean Sciences days, 22-24 September 2014 in Toulouse: (7 Sangoma posters)
- Liège Colloquium, 4-8 May 2015 in Liège (see also deliverable DL6.10)(12 Sangoma contributions)

Chapter 3

Operational users

Among the operational users present at the meetings we can highlight MERCATOR, MUMM, Deltares, ECMWF, BSH, SOCIB, UK Met Office and FMI.

Chapter 4

Follow-up and plans

We plan to send out the final report to the operational users identified during the different meetings as well as the mailing list of the Liège colloquium.
